Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable
investment means an
investment in an
economic activity that
contributes to an
environmental or
social objective,
provided that the
investment does not
significantly harm any
environmental or
social objective and
that the investee

companies follow good governance

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Taxonomy or not.

Product name: abrdn SICAV I - Asian SDG Equity Fund

Legal entity identifier 2138001SZMMAO7HILY92

Sustainable investment objective

Does this financial product have a sustainable investment objective?					
	••	X Yes	••	No	
	^	It made sustainable investments with an environmental objective: 49.03%		It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments	
		in economic activities that qualify as environmentally sustainable under the EU Taxonomy		with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy	
		in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy		with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	
	X	It made sustainable investments with a social objective: 46.92%		with a social objective It promoted E/S characteristics, but did not make any sustainable investments	

To what extent was the sustainable investment objective of this financial product met?

The Fund aimed to achieve long term growth by investing in companies in Asian Market countries which, in our view, were making a positive contribution to society through their alignment achieving the United Nation's Sustainable Development Goals ('SDGs'). Our SDG proposition focused on companies making a material, intentional, positive contribution to the environment and society. The specific methodology and criteria are outlined within our prospectus and website disclosures. For the relevant Prospectus, see abrdn.com. For the Fund's Sustainable Investment Approach, see abrdn.com. The sustainable development goal strategies invested in companies that were making a positive and material contributions to environmental and social challenges aligned with at least one of eight impact pillars or were an SDG Leader. The pillars and associated sub-themes and indicators were developed using the UN SDGs. But above all, we aimed to align our sustainable development objectives with the most pressing global problems according to the UN. Therefore as the needs of the world changed, our impact pillars might evolve. The linkages with the SDGs are below: Circular Economy 0.00%, Sustainable Energy 19.40%, Food & Agriculture 4.90%, Water & Sanitation 0.00%, Health & Social Care 20.40%, Financial Inclusion

10.60%, Sustainable Real Estate & Infrastructure 27.85%, Education & Employment 2.50%, and Impact Leaders 11.50%.

Sustainability indicators measure how the sustainable objectives of this financial product are attained

How did the sustainability indicators perform?

The Fund invested in companies with a minimum of 20% of their revenue, profit, capital or operating expenditure or research and development linked to the UN's SDGs. For companies classified in the benchmark as 'Financials', alternative measures of materiality are used based on loans and customer base. The breakdown of holdings aligned to the SDGs and to SDG leaders was as below: SDG01 - No poverty 2.0%, SDG02 - Zero Hunger 1.5%, SDG03 - Good Health and Well-Being 20.4%, SDG06 - Clean Water and Sanitation 0.0%, SDG07 - Affordable and Clean Energy 28.0%, SDG08 - Decent Work and Economic Growth 12.1%, SDG09 -Industry, Innovation, Infrastructure 13.8%, SDG10 - Reduce Inequalities 0.0%, SDG11 -Sustainable Cities and Communities 3.3%, SDG12 - Responsible Consumption and Production, 0.0%, SDG13 - Climate action, 2.3%, SDG15 - Forestry 2.3%, and SDG Leader 11.5%. The Fund achieved a 71.61% lower carbon intensity than the benchmark as at 30 Sept 2024 (on a WACI basis). Application of the fund's approach resulted in at least 20% of the Fund's investment universe being excluded as at 30 Sept 2024. Further, key performance indicators (KPIs), or targeted outputs, have been set for each company held in the Fund in order to assess how products and services contribute to positive social and environmental outcomes globally. These KPIs in addition to case studies and additional analysis are reported annually in the Fund's SDG Report. Please see the most recent annual SDG report (available here: abrdn.com) for full discussion on these KPIs as they will vary year by year. We also confirm that during the reporting period, company exclusions are applied to exclude the particular areas of investment related to UN Global Compact, ILO and OECD, Norges Bank Investment Management (NBIM), State Owned Enterprises (SOE) Weapons, Tobacco, Gambling, Alcohol, Thermal Coal, Oil and Gas and Electricity Generation. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

...and compared to previous periods?

In the prevopus period the breakdown of holdings aligned to the SDGs and to SDG leaders was as below: SDG01 - No poverty 2.0%, SDG02 - Zero Hunger 1.5%, SDG03 - Good Health and Well-Being 14.9%, SDG06 - Clean Water and Sanitation 0.0%, SDG07 - Affordable and Clean Energy 21%, SDG08 - Decent Work and Economic Growth 7.8%, SDG09 - Industry, Innovation, Infrastructure 9.5%, SDG10 - Reduce Inequalities 0.0%, SDG11 - Sustainable Cities and Communities 3.5%, SDG12 - Responsible Consumption and Production, 2.4%, SDG13 - Climate action, 2.2%, SDG15 - Forestry 1.0%, and SDG Leader 18.0%. The Fund achieved a 66.9% lower carbon intensity than the benchmark as at 30 Sept 2023 (on a WACI basis).

Period	2024	2023
Sustainable investment	95.94%	98.43%
Other environmental	49.03%	39.21%
Social	46.92%	59.22%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology

the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

_ Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring is in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.

• Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/10/2023 - 30/09/2024

What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFAC	Technology	9.74	Taiwan, Republic of China
CSL LTD	Health Care	4.58	Australia
GOODMAN GROUP	Real Estate	3.31	Australia

CONTEMPORARY AMPEREX TECHN-A	Consumer Discretionary	1.93	China
ABB INDIA LTD	Industrials	1.91	India

What was the proportion of sustainability-related investments?

What was the asset allocation?

The Fund committed to hold a minimum of 75% in Sustainable Investments, including a minimum commitment of 15% to assets with an environmental objective and 15% to social objectives.

The Fund invests a maximum of 25% of assets in the "Non Sustainable" category, which is mainly made up of cash, money market instruments and derivatives. The chart below shows the sustainable investments expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
Consumer Discretionary	Consumer Discretionary Products	5.54
Industrials	Industrial Products	7.91
Industrials	Industrial Services	4.10
Materials	Materials	2.01
Energy	Renewable Energy	1.89
Health Care	Health Care	15.76
Financials	Banking	7.84
Financials	Financial Services	1.75
Financials	Insurance	4.52
Technology	Tech Hardware & Semiconductors	18.82
Technology	Software & Tech Services	2.51
Consumer Staples	Consumer Staple Products	2.35
Consumer Staples	Retail & Wholesale - Staples	2.95
Real Estate	Real Estate	9.57
Communications	Telecommunications	3.31
Utilities	Utilities	5.74

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels

corresponding to the

best performance.

Enabling activities

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives).

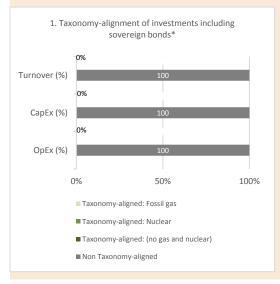

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

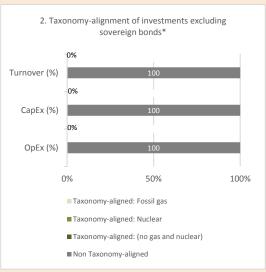

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes	
In fossil gas	In nuclear energy
X No	

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

The fund holds 0% investments made in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 49.03% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 46.92%

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 4.06% of assets in the "not sustainable" category. The investments included are cash, money market instruments, and may also include derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to attain the sustainable investment objective during the reference period?

Diverse SDG Exposure:

We aim to invest in companies whose products and services align with one of our eight impact pillars and measure how the businesses help countries achieve the UN's sustainable development agenda. During the reference period we had holdings exposed to all eight or our impact pillars, fulfilling our goal of offering broad access to the SDG.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 22/852.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective. How did the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Not applicable
