

Pre-contractual disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name:

abrdn SICAV I - Emerging Markets SDG Corporate Bond Fund

Legal entity identifier

213800ZA6YFUJIKUV566

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### Sustainable investment objective

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of **sustainable investments with an environmental objective**: 15%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of **sustainable investments with a social objective** 15%

It promotes **Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

What is the sustainable investment objective of this financial product?

Sustainability indicators measure how the sustainable objectives of this financial product are attained

Our Emerging Markets SDG Corporate Bond Fund seeks to generate strong long-term performance by allocating capital to companies that may deliver a strong financial return and demonstrate – via their products, services, and actions – a clear and material alignment to one or more of the United Nation’s (UN) Sustainable Development Goals (SDGs).

In doing so, companies reflect a commitment to help address the world’s most pressing problems and support a shift to a more sustainable economy. The SDGs are designed to address the world’s major long-term challenges. These include climate change, growing social inequality, and unsustainable production and consumption. We believe alignment with the SDGs creates tangible opportunities for companies to contribute positively to society and the environment, while simultaneously enhancing the long-term financial value of the business.

The Fund seeks to:

- Invest in a portfolio of companies that we believe can deliver strong financial returns,

while actively contributing towards the UN SDGs and delivering positive and sustainable change.

- Build a diversified portfolio of high-quality companies by country and sector, aiming to deliver both positive societal outcomes and attractive financial returns.
- Benefit from our proactive company engagement to drive positive change in corporate behaviour.
- Leverage abrdn's long history and extensive resources in emerging markets with local offices and over 100 investment professionals covering 80 countries and over 1,000 companies.

The Fund incorporates our Sustainable Development Assessment, which is a supplement to the investment process specific to the sustainable development product suite. These funds will combine the expert analysis of our fixed income and equity teams with the insights of our ESG specialists, both on-desk and the centralised ESG Research team, to determine alignment to the SDGs. Alignment to sustainable development will be determined against abrdn's established eight-pillar investment framework for the SDGs.

The Fund's reference benchmark is the JPM ESG CEMBI Broad Diversified Index. The index is representative of the investment opportunities we explore for the Fund and applies ESG exclusions. Index construction takes into account the environmental and socio-ethical factors by excluding issuers operating in certain sectors, namely thermal coal, tobacco and weapons. The exclusion criteria also encompass a corporate sustainability aspect by filtering issuers in violation of the UN Global Compact principles. Issuers with JESG scores less than 20 are also excluded. Full index methodology can be found at J.P. Morgan Markets.

● ***What Sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?***

The measure used by the Fund is a carbon intensity target lower than the benchmark. The Fund will invest in companies with minimum of 20% of their revenue, profit, capital or operating expenditure or research and development linked to the UN's SDGs. For companies classified in the benchmark as "Financials", alternative measures of materiality are used based on loans and customer base. The Fund will also invest up to 20% in SDG leaders.

The Fund also reduces the investment universe by a minimum of 20%.

● ***How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?***

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives.

abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration, Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm".

Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. Abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti - corruption and anti - bribery matters.

& 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

### iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue.

- → *How have the indicators for adverse impacts on sustainability factors been taken into account?*

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

**UNGC:** The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

**Controversial Weapons:** The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

**Thermal Coal Extraction:** The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at [www.abrdn.com](http://www.abrdn.com) under "**Fund Centre**".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

- → *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

## Does this financial product consider principal adverse impacts on sustainability factors?

- Yes, this Fund considers Principal Adverse Impacts (PAI) on sustainability factors. Principal Adverse Impact Indicators are metrics that measure the negative effects on environmental and social matters. abrdn consider PAIs within the investment process for the Fund, this may include considering whether to make an investment, or they may be used as an engagement tool for example where there is no policy in place and this would be beneficial, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan. abrdn assess PAIs by using, amongst others, the PAI indicators referred to in the SFDR Delegated Regulation; however, dependent on data availability, quality and relevance to the investments not all SFDR PAI indicators may be considered. Where Funds consider PAIs, information on that consideration will be made available in annual reports.

No

## What investment strategy does this financial product follow?

The Fund seeks to generate strong long-term performance by allocating capital to companies that may deliver a strong financial return and demonstrate – via their products, services, and actions – an active and material alignment to one or more of the United Nation’s (UN) Sustainable Development Goals (SDGs)

In doing so, companies reflect a commitment to help address the world’s most pressing problems and support a shift to a more sustainable economy. The SDGs are designed to address the world’s major long-term challenges. These include climate change, growing social inequality, and unsustainable production and consumption. We believe alignment with the SDGs creates tangible opportunities for companies to contribute positively to society and the environment, while simultaneously enhancing the long-term financial value of the business.

The Fund seeks to:

- Invest in a portfolio of companies that we believe can deliver strong financial returns, while actively contributing towards the UN SDGs and delivering positive and sustainable change.
- Build a diversified portfolio of high-quality companies by country and sector, aiming to deliver both positive societal outcomes and attractive financial returns.
- Benefit from our proactive company engagement to drive positive change in corporate behaviour.
- Leverage abrdn’s long history and extensive resources in emerging markets with local offices and over 100 investment professionals covering 80 countries and over 1,000 companies.

The Fund incorporates our Sustainable Development Assessment, which is a supplement to the investment process specific to the sustainable development product suite. These funds will combine the expert analysis of our fixed income and equity teams with the insights of our ESG specialists, both on-desk and the centralised ESG Research team, to determine alignment to the SDGs. Alignment to sustainable development will be determined against abrdn’s established eight-pillar investment framework for the SDGs.

In addition, abrdn apply a set of company exclusions, which are related to normative screening (UN Global Compact, ILO and OECD), Tobacco, Thermal Coal, Oil & Gas, Electricity Generation, Gambling, Alcohol, Adult Entertainment and Weapons.

- ***What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?***

The Fund approach identifies companies which are aligned to the UN Sustainable Development Goals. These goals are designed to address the world’s major long-term challenges. These include climate change, growing social inequality, and unsustainable production and consumption. For companies classified in the benchmark as "Financials",

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

alternative measures of materiality are used based on loans and customer base. The Fund will also invest up to 20% in SDG leaders.

Distinct company research notes for each stock in the Sustainable Development funds capture and formally document the SDG impact made by each company and the needs they meet across the SDG pillars:

- Circular economy
- Sustainable energy
- Food and agriculture
- Water and sanitation
- Health and social care
- Financial inclusion
- Sustainable real estate and infrastructure
- Education and employment
- SDG leader

Additionally, we satisfy the three binding criteria for Sustainable Investment:

- Economic contribution
- Do no significant harm
- Good Governance

The Fund also has a binding commitment to a carbon intensity target lower than the benchmark.

abrdrn apply a set of company exclusions, which are related to normative screening (UN Global Compact, ILO and OECD), Tobacco, Thermal Coal, Oil & Gas, Electricity Generation, Gambling, Alcohol, Adult Entertainment and Weapons. These screening criteria apply in a binding manner and on an ongoing basis.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● ***What is the policy to assess good governance practices of the investee companies?***

For this Fund, the investee company needs to follow good governance practices in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance. This can be demonstrated by the monitoring of certain PAI indicators, for example corruption, tax compliance and diversity. In addition, by using abrdrn's proprietary ESG scores within the investment process abrdrn screen out any investments with low governance scores. Our governance scores assess a company's corporate governance and management structure (including remuneration of staff policies) and the quality and behaviour of its leadership and management. A low score will typically be given where there are concerns in relation to financially materially controversies, poor tax compliance or governance concerns, or poor treatment of employees or minority shareholders.

The investment must further be aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process.

## What is the asset allocation and the minimum share of sustainable investments?

The Fund commits to a minimum of 75% in Sustainable Investments, including a minimum commitment of 15% to assets with an environmental objective and 15% to social objectives.

The Fund invests a maximum of 25% of assets in the “Non Sustainable” category, which is mainly made up of cash, money market instruments and derivatives.

**Asset allocation** describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

### ● **How does the use of derivatives attain the sustainable investment objective?**

The Fund will not use derivatives to attain any sustainable investment objective.

### **To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Fund has not set a minimum proportion of investments in Taxonomy aligned economic activities. This graph represents 100% of the total investment.

### ● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy ?<sup>1</sup>**

Yes

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

In fossil gas

In nuclear energy

No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy alignment of investments including sovereign bonds\*

2. Taxonomy alignment of investments excluding sovereign bonds\*

This graph represents 100 % of the total investments.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### What is the minimum share of investments in transitional and enabling activities?

Not applicable

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund makes investments on the basis of the SDG investment approach, allocating capital to companies that may deliver a strong financial return and demonstrate – via their products, services, and actions – a clear and material alignment to one or more of the United Nation's (UN) Sustainable Development Goals (SDGs). The SDGs are designed to address the world's major long-term challenges. These include climate change, growing social inequality and unsustainable production and consumption.

abrdn believe alignment with the SDGs creates tangible opportunities for companies to contribute positively to society and the environment, while simultaneously enhancing the long-term financial value of the business, which result in the Fund committing to a minimum 75% to sustainable investments which are inclusive of

are environmentally sustainable investments that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

both environmental and social objectives that aren't explicitly taxonomy aligned. The minimum share of sustainable investments with an environmental objective is 15%.

### **What is the minimum share of sustainable investments with a social objective?**

The Fund makes investments on the basis of the SDG investment approach, allocating capital to companies that may deliver a strong financial return and demonstrate – via their products, services, and actions – a clear and material alignment to one or more of the United Nation's (UN) Sustainable Development Goals (SDGs). The SDGs are designed to address the world's major long-term challenges. These include climate change, growing social inequality and unsustainable production and consumption.

abrdn believe alignment with the SDGs creates tangible opportunities for companies to contribute positively to society and the environment, while simultaneously enhancing the long-term financial value of the business, which result in the Fund committing to a minimum 75% to sustainable investments which are inclusive of both environmental and social objectives that aren't explicitly taxonomy aligned. The minimum share of sustainable investments with a social objective is 15%.

### **What investments are included under “#2 Not sustainable”, what is their purpose and are there any minimum environmental or social safeguards?**

The Fund may invest in securities that are not deemed sustainable including cash, money market instruments and derivatives but only for the purpose of hedging and liquidity management.

There are certain environmental and social safeguards that are met by applying PAI's. Where relevant, these are applied to the underlying securities. Many pre-investment PAI indicators are considered but below are the ongoing post-investment PAI indicators that continue to be considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

## Is a specific index designated as a reference benchmark to meet the sustainable investment objective?

Yes

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

- **How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?**

The J.P. Morgan ESG CEMBI Broad Diversified Index (USD) tracks liquid, US Dollar emerging market fixed and floating-rate debt instruments issued by corporate entities. The index applies an ESG scoring and screening methodology to tilt toward issuers ranked higher on ESG criteria and green bond issues, and to underweight and remove issuers that rank lower. The J.P. Morgan ESG CEMBI Broad Diversified Index (USD) is based on the flagship J.P. Morgan CEMBI Broad Diversified Index. The ESG scoring incorporates a 3-month rolling average and is refreshed on a quarterly basis.

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

Not applicable

- **How does the designated index differ from a relevant broad market index?**

The index applies an ESG scoring and screening methodology to tilt toward issuers ranked higher on ESG criteria and green bond issues, and to underweight and remove issuers that rank lower. The J.P. Morgan ESG CEMBI Broad Diversified Index (USD) is based on the flagship J.P. Morgan CEMBI Broad Diversified Index
