FSSA Japan Equity Fund Class III (Accumulation) USD

a sub-fund of First Sentier Investors Global Umbrella Fund plc (the Company)

ISIN IE00BSJWPM96

First Sentier Investors (Ireland) Limited, the Management Company

Objectives and investment policy

Objective: The Fund aims to grow your investment.

Policy: The Fund invests at least 70% of its assets in shares of companies based in, or closely associated with, Japan that are listed on exchanges worldwide. The Fund may invest up to 100% in any industry.

The Fund's performance is compared against the value of the TOPIX (Tokyo Stock Price Index).

The Fund is actively managed meaning that the Fund's manager uses expertise to pick investments rather than tracking a benchmark. A majority of the Fund's assets could be components of the benchmark. Investment of the Fund's assets is not constrained by the benchmark composition and the Fund's manager has discretion within the Fund's investment policy to invest in assets without regard to the benchmark.

The Fund may use derivatives with the aim of risk reduction or efficient management.

You can buy and sell shares in the Fund on any dealing day. A dealing day is generally defined as a day on which Irish banks and, if applicable, the relevant stock exchange(s) are open for business. Exceptions are noted on the FSI website. As long as we receive your instruction before 10 am (Irish time) on a dealing day, shares will be bought and sold at that day's price.

The Fund will not pay any income out; instead any income will be reflected in the value of your shares.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

- The synthetic risk reward indicator (the SRR) rating is not a measure of the risk of you losing the entire value of your investment but describes how much the value of the share class has gone up and down in the past. Where a share class has not yet launched, the SRR is calculated using representative data.
- The SRR rating is based on historical data which may not be a reliable indication of the future risks and rewards of the share class.
- We cannot guarantee that the rating of the share class will remain the same; it may change over time.
- Even the lowest rating 1 does not mean a risk free investment.
- On a scale of 1 (less risky) to 7 (more risky), this share class has a rating of 6 due to its past performance (or representative data) and the nature of its investments.

- Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level.

- Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss.

- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested.

Material risks not adequately captured by the SRR:

- **Currency risk:** the Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

- **Single country / specific region risk:** investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.

- **Smaller companies risk:** investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

For further information on risks, please refer to the Risk Factors section in the Company's prospectus.
