- This Fund is categorized as a 4 because funds of this type have historically experienced high rises and falls in value. However, even the lowest category does not mean "risk free". The risk category shown above is not guaranteed and may shift over time. Historical data may not be a reliable indication for the future.
- Financial techniques / derivatives: The fund may use financial derivative instruments as part of the investment process. There is no guarantee that they will deliver the expected results.

The Fund may also be exposed to credit risk in relation to the financing counterparties with whom the Fund trades or places margin or collateral in respect of transactions in derivative instruments and may bear the risk of counterparty default.
- Liquidity risk: Investments that trade less can be more difficult or more costly to buy, or to sell, than more liquid or active investments. It may not be possible to sell or otherwise dispose of illiquid securities both at the price and within a time period deemed desirable by the Fund.
- Currency exchange rate fluctuations may have a positive or negative impact on the value of your investment.
- Emerging markets risk: Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries. This may mean your money is at greater risk.
