First Sentier Investors (UK) Funds Limited (trading as FSSA Investment Managers), the authorised corporate director of the Company

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Objectives and investment policy

Objective: The Fund aims to achieve capital growth over the medium to long term (at least three years).

Policy: The Fund invests at least 80% in shares of companies based in or where the majority of their activities take place in the Asia Pacific region (excluding Japan). This includes companies that are listed on exchanges worldwide which provide exposure to the Asia Pacific region (excluding Japan).

The Fund may also invest up to 20% in shares of companies around the world.

The Fund may invest up to 10% in other funds.

The Fund may use derivatives to reduce risk or to manage the Fund more efficiently.

Strategy: The Fund's investment strategy is centred on identifying quality companies, buying them at a sensible price and holding for the medium to long-term (at least three years). The Manager looks for founders and management teams that act with integrity and risk awareness, and companies with a dominant market position that have the potential to deliver continual and predictable returns over the medium to long-term.

Benchmark: The Fund's performance is compared against the value of the MSCI AC Asia Pacific ex Japan Index. The Fund is managed with a view to remaining within the Asia Pacific Ex Japan Sector.

The Fund's manager may use its discretion when deciding which investments should be held by the Fund.

The Fund is actively managed; investment of the Fund's assets is not constrained by the benchmark composition and the Fund's manager has complete discretion within the Fund's investment policy to invest in assets without regard to the benchmark.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

You will not receive any income from your investment. Any income will be rolled up into the value of shares in the Fund.

You can buy and sell shares in the Fund on any business day. As long as we receive your instruction before 12 noon (UK time), shares will be bought at that day's price.

Risk and reward profile

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing your investment but describes how much the value of the Share Class has gone up and down in the past. Where a Share Class has not yet launched, the SRRI is calculated using representative data.
- The SRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the Share Class.
- We cannot guarantee that the rating of the Share Class will remain the same; it may change over time.
- Even the lowest rating 1 does not mean a risk free investment.
- On a scale of 1 (less risky) to 7 (more risky), this Share Class has a rating of 5 due to its past performance (or representative data) and the nature of its investments. Categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level, and 6-7 a high level.
- Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss.

- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested.

Material risks not adequately captured by the SRRI:

- **Emerging market risk:** Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.
- **Currency risk:** the Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.
- **Single country / specific region risk:** investing in a single country or specific region may be riskier than investing in a number of different countries or regions. Investing in a larger number of countries or regions helps spread risk.
- **Smaller companies risk:** investments in smaller companies may be riskier and more difficult to buy and sell than investments in larger companies.

For further information on risks, please refer to the Risk Factors section in the Company's prospectus.

Charges for this Fund

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
