

KEY INVESTOR INFORMATION

This document provides you with the key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Trojan Global Equity Fund (Ireland) (the "fund"), Class S GBP accumulation, a fund within Trojan Funds (Ireland) plc (ISIN: IE0003IDUTE9)

The fund is managed by Waystone Management Company (IE) Limited.

Objectives and Investment Policy

Objective

To seek to achieve capital growth over the long term (at least 5 years). There is no guarantee that the objective will be met or that capital growth will be delivered over any time period and you may get back less than you invest.

Investment Policy

To invest at least 80% of its assets globally in equities (company shares) and equity related securities (investments whose value is linked to the performance of the shares in one or more companies). The fund may also invest in bonds (for example, loans to either a company or government that pay interest), money market instruments (for example, short term loans that pay interest), deposits and cash. Exposure to these asset classes may be achieved by investing in investment trusts and other funds (including those managed by the Manager, the Investment Manager and their associates). The fund will invest in line with the requirements of the Investment Manager's Climate Change Mitigation Policy (as further described in the 'Investment Strategy' section of the supplement of the fund).

The Investment Manager's investment decisions will be based on an assessment of various factors including growth in cash flow and profits. The Investment Manager will seek to construct a portfolio of investments which will grow in value over time.

The Investment Manager aims to construct a portfolio for the fund that seeks to promote climate change mitigation through an investment process which assesses a company's alignment to, or commitment to align to net zero greenhouse gas emissions by 2050. The Investment Manager also assesses the corporate governance practices of companies in which the fund may invest. The asset classes to which this investment process applies are set out in the Investment Manager's Climate Change Mitigation Policy on the Investment Manager's website at www.taml.co.uk. It does not apply to other assets within the fund.

Other features of the fund:

- The fund is actively managed. The Investment Manager uses its expertise to select investments for the fund and has the discretion to invest without the need to adhere to a particular benchmark.
- The fund can invest across different geographic areas and industry sectors without limitation.
- You can buy and sell shares in the fund each business day.
- Income from the fund will be added to the value of your investment.
- Derivatives (whose value is linked to that of another investment, e.g. company shares, currencies) may be used to manage the risk profile of the fund.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

- This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.
- The fund has been classed as 6 because its volatility has been measured as above average to high.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time.
- The risk and reward indicator does not take into account the following risks of investing in this fund.
- Liquidity Risk: Smaller companies' securities are often traded less frequently than those of larger companies which means they may be more difficult to buy and sell. Their prices may also be subject to short term swings.
- Position / Market Risk: The investments of the fund are subject to normal market fluctuations and the risks inherent in investment in securities markets and there can be no assurance that the value of the relevant securities will go up in value or that the investment objective will be achieved.
- Derivative risk: A derivative may not perform as expected and may create losses greater than its cost.
- Counterparty risk: The failure of a firm involved in a transaction with the fund or providing services to the fund may expose the fund to financial loss.
- Currency Risk: As the fund invests in securities which are not in the base currency, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' below.

Charges for this Fund

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
Charges taken from the Sub-Fund over the year	
Ongoing Charges	0.76%
Charges taken from the Sub-Fund under certain specific conditions	
Performance Fee	None

The entry charge shown is a maximum figure. In some cases investors may pay less. You can find out the actual charges from your financial advisor or distributor.

The ongoing charges figure is capped. They exclude portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective undertaking.

The fund's annual report will include detail on the charges made.

You may also be charged a dilution levy to cover dealing costs incurred by the fund when it buys or sells investments on your entry to or exit from the fund.

For more information about charges, please see the sections of the prospectus and the relevant supplement to the prospectus headed 'Fees and Expenses', each of which may be obtained free of charge from the addresses in 'Practical Information' below.

Past Performance

- Because the share class has less than one calendar year's performance, there is insufficient data to provide a useful indication of past performance.
