Objectives and investment policy

The Product seeks to provide risk-adjusted returns through investments in local currencies and local interest rates of emerging market countries.
The Product invests in a diversified portfolio comprised predominately of debt instruments (i.e. notes, bonds, certificates, etc) issued and/or denominated in the currencies of developing countries ("emerging markets") in Latin America, Asia, Central Europe, Eastern Europe, Africa and the Middle East, with strategic emphasis on emerging market interest rate duration exposure and/or emerging market currency risk exposure. The Product also may invest a maximum of 1/3 of its net assets in debt instruments issued by other countries, including OECD member states, which will be denominated and have exposure to hard currencies.
The Product can also take long and short positions in markets, securities and groups of securities through derivative contracts, may invest up to 10% of its net assets in contingent convertible securities (CoCos), and may invest up to 20% of its net assets in asset-backed securities (ABS). The Product may also invest in Chinese onshore debt securities through Bond Connect, a market facilitating investment to the Chinese bond market. The Product may invest in debt securities of any maturity or credit rating and may invest in high yield debt securities. The Product may invest up to 10% of its net assets in distressed or defaulted debt securities.

The Product's performance is measured against the benchmark, the JPMorgan Government Bond Index-Emerging Market (GBI-EM) Global Diversified. The Product is actively managed within its objective and is not constrained by a benchmark.
This Product promotes environmental and/or social characteristics within the meaning of Article 8 of SFDR.
Any income generated by the Product is reinvested to grow the value of your investment.
Investors should consider the Product only for the more aggressive portion of their portfolio. In addition, the Product is intended for investors who can accept the risks entailed in investing in securities of emerging market countries. The Product is suitable for investors who: Seek a return over the long term; Seek income whether in the form of capital appreciation or distributions, as outlined in the "Dividend Policy" section of the prospectus; Accept the risks associated with this type of investment, as set out in the "Risk Factors" section of the prospectus.
You can buy and sell shares in the Product on a daily basis on any full working day in Luxembourg and when the New York Stock Exchange is open for trading.
Further information on the Product's investment objectives and policy are detailed in the prospectus.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk ← → **Typically higher rewards, higher risk**

1	2	3	**4**	5	6	7

- This Fund is categorized as a 4 because funds of this type have historically experienced moderate rises and falls in value. However, even the lowest category does not mean "risk free". The risk category shown above is not guaranteed and may shift over time. Historical data may not be a reliable indication for the future.
- Financial techniques / derivatives: The fund may use financial derivative instruments as part of the investment process. There is no guarantee that they will deliver the expected results.
- Credit and counterparty risk: Issuers of the securities or other instruments in which the Fund invests may be subject to credit difficulties leading to the loss of some or all of the sums invested in such securities or instruments or payments due on such securities or instruments. The Fund may also be exposed to credit risk in relation to the financing counterparties with whom the Fund trades or places margin or collateral in respect of transactions in derivative instruments and may bear the risk of counterparty default.
- Liquidity risk: Liquidity risk exists when a particular instrument is difficult to purchase or sell. Investments that trade less can be more difficult or more costly to buy, or to sell, than more liquid or active investments. It may not be possible to sell or otherwise dispose of illiquid securities both at the price and within a time period deemed desirable by the Fund.
- Debt securities risk: Debt securities are affected by changes in interest rates and credit quality. The Fund will be more sensitive to interest rates depending on the average maturity or average duration of its portfolio. Below investment grade securities and distressed or defaulted debt are more sensitive to these risks.
- Currency exchange rate fluctuations may have a positive or negative impact on the value of your investment.
- Emerging markets risk: Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries. This may mean your money is at greater risk.
- Investments through the Bond Connect programme may be subject to additional risks, including liquidity, operational, clearing, settlement, market suspension, and custody risks.
- All the risks currently identified as being applicable to the Fund are detailed in the prospectus.
