Stonehage Fleming Global Best Ideas Equity Fund (the "Fund"), Class H GBP, ISIN: IE00BDB5NV68

Product

STONEHAGE FLEMING POOLED INVESTMENTS (IRELAND) PLC (the "Company"), is authorised and supervised by the Central Bank of Ireland ("CBI") in Ireland.

PRIP Manufacturer: Link Fund Manager Solutions (Ireland) Limited

Website: <https://www.linkgroup.eu/policy-statements/irish-management-company/>, Telephone number: +353 1 400 5300

Depository: The Bank of New York Mellon SA/NV, Dublin Branch. ("the Depository")

What is this product?

Type: The Fund is domiciled in Ireland and is an open-ended investment company ("OEIC") and qualifies as an undertaking for collective investment in transferable securities ("UCITS").

Intended Retail Investor: The Fund is suitable for investors seeking long term capital appreciation and capital preservation with income as a residual objective with an initial subscription of £3,500,000.

Term: This Fund has no maturity date.

Objectives:

The Fund aims to achieve long term growth in capital and income by developing a portfolio of equities and equity related instruments issued by or in connection with high quality listed companies from around the world.

The Fund intends to invest predominantly in equity and equity related securities issued by or in connection with high quality larger capitalisation companies. Subject to the Fund's objective, policies and investment powers, the Investment Manager is allowed to make discretionary choices when deciding which investments should be held in the Fund. The Fund has no specific target market or geographic sector.

The Fund performance will be measured against the Morningstar USD Moderate Allocation Category Average (the "Benchmark").

The Fund has the discretion to invest in a range of investments as described above. The Fund has no specific target market or geographic sector.

The Fund is considered to be actively managed in reference to MSCI World All Countries TR (the "Comparative Index") by virtue of the fact that it uses the Comparative Index for performance comparison purposes. Certain of the Fund's securities may be components of and may have similar weightings to the Comparative Index. However the Comparative Index is not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Comparative Index.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less than your original investment. In addition to the market price risk, please refer to the Fund's Prospectus for further information.

If the Fund currency differs from your investment currency, you will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level. Poor market conditions could impact your returns.

The value of your investment may fall and you may not get back the amount you invested.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The figures shown include all the costs of the product itself, but do not take into account your personal tax situation and may not include all the costs that you pay to your advisor or distributor, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable, moderate, and favourable scenarios shown are illustrations of what you might get back using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Investment: GBP 10,000			
Scenarios		If you exit after 1 year	If you exit after 5 years (recommended holding period)
Stress Scenario	What you might get back after costs	1,720 GBP	1,460 GBP
	Average return each year	- 82.81 %	- 31.94 %
Unfavourable Scenario	What you might get back after costs	8,450 GBP	8,830 GBP
	Average return each year	- 15.55%	- 2.46%
Moderate Scenario	What you might get back after costs	11,350 GBP	16,930 GBP
	Average return each year	13.49%	11.11%
Favourable Scenario	What you might get back after costs	13,270 GBP	22,960 GBP
	Average return each year	32.74%	18.09%

Unfavourable: This type of scenario occurred for an investment between 12/2021 and 11/2022.

Moderate: This type of scenario occurred for an investment between 07/2017 and 06/2022.

Favourable: This type of scenario occurred for an investment between 07/2016 and 06/2021.

What happens if the Company is unable to pay out?

If the Company is not able to pay what is owed to you, you are not covered by any national compensation scheme. To protect you, the assets of the Sub-Fund are held with a separate company, a depositary. Should the Company default, the depositary would liquidate the investments and distribute the proceeds to the investors. However, in the worst case, you could lose your entire investment

What are the costs?

Costs over Time

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for two different holding periods. The figures assume you invest GBP 10,000. The figures are estimates and may change in the future. The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs and show you the impact that all costs will have on your investment over time.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed that you invest GBP 10,000 and that in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

Investment: GBP 10,000		
	If you exit after 1 year	If you exit after 5 years (recommended holding period)
Total costs	10 GBP	85 GBP
Annual Cost Impact (*)	0.1 %	0.11 %

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 11.22% before costs and 11.11% after costs.

Composition of Costs

			If you exit after 1 year
One-off costs upon entry or exit	Entry costs	The impact of the costs you pay when entering your investment. We do not charge an entry fee for this investment, but the person selling you the product may do so.	N/A
