## What is this product?

**Intended Retail Investor:** Profile of a Typical Investor: Investment in the Fund is suitable only for those persons and institutions for whom such investment does not represent a complete investment program, who understand the degree of risk involved (as detailed under the section of the Prospectus and Supplement headed "Risk Factors"), can tolerate a medium level of volatility and believe that the investment is suitable based upon investment objective and finance needs. Investment in the Fund should be viewed as medium to long term.

**Term:** This fund has no maturity date.

## Objectives:

The fund aims to increase the value of the amount you invest in it over a period of years.

The fund invests in equity and equity related securities of companies that are either primarily traded on market exchanges in the Asia Pacific Region including Japan (the "Region") or that derive at least 50% of their revenues from business activities in that Region, but which may be listed and traded on other Recognised Exchanges. The fund is considered to be actively managed in reference to the MSCI AC Pacific Ex Japan Index (the "Benchmark") by virtue of the fact that it uses the Benchmark solely for performance comparison purposes.

## What are the risks and what could I get in return?

### Risk indicator

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. In addition to the market price risk, please refer to the fund's prospectus for further information.

If the fund currency differs from your investment currency, you will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level. Poor market conditions could impact your returns.

The value of your investment may fall and you may not get back the amount you invested.

Please refer to the ICAV's prospectus for more detail.

## Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The figures shown include all the costs of the product itself, but do not take into account your personal tax situation and may not include all the costs that you pay to your advisor or distributor, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Investment: GBP 10,000			
Scenarios		If you exit after 1 year	If you exit after 5 years (recommended holding period)
Stress scenario	What you might get back after costs	3 590 GBP	3 140 GBP
	Average return each year	- 64.11 %	- 20.68 %
Unfavourable scenario	What you might get back after costs	7 550 GBP	8 850 GBP
	Average return each year	- 24.51%	- 2.41%
Moderate scenario	What you might get back after costs	9 960 GBP	12 220 GBP
	Average return each year	- 0.44%	4.08%
Favourable scenario	What you might get back after costs	13 560 GBP	16 200 GBP
	Average return each year	35.6%	10.13%

Unfavourable: This type of scenario occurred for an investment between 01/2022 and 12/2022.

Moderate: This type of scenario occurred for an investment between 05/2014 and 04/2019.

Favourable: This type of scenario occurred for an investment between 03/2016 and 02/2021.

### What happens if the Company is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should we default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

### What are the costs?

#### Costs over Time

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for two different holding periods. The figures assume you invest GBP 10,000. The figures are estimates and may change in the future. The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs and show you the impact that all costs will have on your investment over time.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed that you invest GBP 10,000 and that in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

Investment: GBP 10,000		
	If you exit after 1 year	If you exit after 5 years (recommended holding period)
<b>Total Costs</b>	631 GBP	<b>1294 GBP</b>
Annual Cost Impact (*)	6.31 %	2.12 %

### Composition of Costs

			If you exit after 1 year
One-off costs upon entry or exit	Entry costs	5.00% of the amount you pay in when entering this investment. These costs are already included in the price you pay.	500 GBP
	Exit costs	The impact of the costs you pay when exiting your investment. We do not charge an exit fee for this product, but the person selling you the product may do so.	N/A
Ongoing costs	Management fees and other administrative or operating costs	0.91% are incurred each year in managing your investments including those incurred by any underlying investments.	123 GBP
	Transaction costs	0.07% is the impact of the costs incurred when we are buying and selling underlying investments for the product.	7 GBP
Incidental costs taken under specific conditions	Performance fees	There is no performance fee for this product.	N/A

### How long should I hold it and can I take money out early?

LFMSI recommends a minimum holding period of 5 years for investments made into this fund. If you sell your shares before the end of the recommended holding period you may increase the risk of receiving back less than you invested.

**Recommended holding period: 5 years**

## How can I complain?

Complaints concerning the operation of any funds offered by LFMSI may be referred to the Complaints Department, Link Fund Manager Solutions Ireland Limited ('LFMSI'), 1st Floor, 2 Grand Canal Square, Grand Canal Harbour, Dublin 2, D02 A342, Ireland or by email to [LFMSI\\_Oversight@linkgroup.ie](mailto:LFMSI_Oversight@linkgroup.ie) or by telephone to +353 1 400 5300. ## Other relevant information

Alongside this document, please read the prospectus. Copies of the prospectus, the latest annual and semi-annual reports, as well as the latest published prices of the shares in the fund and other information, including how to buy and sell shares are available from the administrator or the website below.

You may switch your shares to the shares of another sub-fund of the Company. A fee may apply. Please refer to the fund prospectus for full details.

The fund is one of a number of sub-funds. The assets and liabilities of each sub-fund are segregated by law from each other and the rights of investors and creditors in relation to any sub-fund should normally be limited to the assets of that sub-fund. However, the Company is a single legal entity and may operate in jurisdictions that may not recognise such segregation.

The above information and details of the past performance of the fund and the previous performance scenario calculations can be found on the website <https://www.guinnessgi.com/literature#tab-regulatory-documents>. The past performance chart shows the share class's performance as the percentage loss or gain per year over the last 4 years.
