WHAT IS THIS PRODUCT?

Type:

This product is a UCITS Fund.

Term:

This product is not subject to any fixed term and may not be terminated unilaterally by the PRIIPs Manufacturer.

Objectives:

The Fund seeks to achieve long-term capital appreciation by investing in companies in developed markets outside of the United States of America, as well as in established companies in emerging and frontier markets that the Investment Manager regards as well managed, financially sound, fast growing, strongly competitive, and priced by the market below their estimated value.

The securities will primarily be common stocks and other securities with equity characteristics, including but not limited to preferred stocks, warrants (not more than 5% of the Fund's Net Asset Value), rights (which are issued by a company to allow holders to subscribe for additional securities issued by that company), convertible securities, Depository Receipts, equity-linked notes and participatory notes as more particularly set out in the section "Funds" in the Prospectus. Under normal circumstances at least 70% of the Fund's net assets will be invested in the foregoing instruments, i.e., freely transferable equities and equity related securities primarily of issuers listed or traded on a regulated stock exchange or domiciled in Europe, the Pacific Rim, Canada, Mexico and emerging or frontier markets. The Fund may also invest (up to 10% of its Net Asset Value) indirectly in such securities through holdings in open-ended collective investment schemes that satisfy Regulation 3(2) of the Regulations which shall be predominantly in the form of exchange traded funds and listed and traded in the United States and Europe. No more than 30% of the Net Assets of the Fund may be invested in emerging and frontier markets. The Fund may hold investments from time to time that are listed or traded in Russia. It is not anticipated that such investments will normally constitute a substantial element of the Fund and shall not in any event exceed 20% of the net assets of the Fund. Investment will only be made in equity securities that are listed or traded on level 1 or level 2 of the RTS Stock Exchange and MICEX. The Fund will invest on a long only basis.

The fund has the freedom to invest outside its principal geographies, market sectors, industries or asset classes.

The Fund will be highly diversified and therefore will not be concentrating on any specific regions or economic sectors. It will pursue a policy of active stock selection in the markets in which it operates.

The fund's performance should be assessed against its target benchmark being to exceed the MSCI All Country World ex-US Index.

The Fund is actively managed.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

The risk indicator assumes you keep the product for 5 Years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

currency risk. The underlying funds may receive payments in a different currency, so the final return you will get depend on the exchange rate between the two. This risk is not considered in the indicator shown above.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of the fund to pay you.

Due to effects of unusual market conditions, other risks could be triggered, such as: credit and counterparty, liquidity, market, currency, and derivatives risks. If we are not able to pay you what is owed, you could lose your entire investment.

However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10 000 is invested.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MY MONEY OUT EARLY?

Recommended holding period: 5 Years

We recommend a holding period of at least one full market cycle, which we estimate to be approximately five years. This is consistent with the Investment Manager's long-term investment approach. There is no required holding period; the Fund has daily liquidity, and you may disinvest at any time. Please see the Prospectus section entitled "Repurchase of Shares" for additional information.

There are no penalties for disinvesting, nor impact on risk or performance profile of the Fund, if you cash in before the end of the recommended holding period. Cash in at an early stage will increase the risk of lower investment returns or a loss.
