WHAT IS THIS PRODUCT?

Type: Shares in a Variable Capital Company authorised as a UCITS

Term: This product is not subject to any fixed term.

Objective: The Fund aims to grow your investment. Pursuant to the EU Sustainable Finance Disclosure Regulation (EU 2019/2088), this Fund also has sustainable investment as its objective under Article 9.

Policy: The Fund invests at least 70% of its assets in shares of companies in emerging markets or whose business is predominantly based in emerging markets and that are listed on exchanges worldwide. The Fund may invest up to 100% of its assets in emerging markets and any industry, or companies of any size. Emerging markets are countries that are progressing toward becoming advanced, usually shown by some development in financial markets, the existence of some form of stock exchange and a regulatory body. The Fund will not invest more than 50% of its assets in China A Shares. The Fund invests at least 90% in shares of high-quality companies which are positioned to contribute to, and benefit from, the sustainable development of the countries in which they operate. Investment decisions use a thematic sustainability approach and an assessment aiming to identify high quality companies based on three key points:° Quality of management including integrity, attitude to environmental and social impacts, corporate management, long term performance and risk.° Quality of the company including its social usefulness, their environmental impacts and efficiency and responsible business practices.° Quality of the company's finances and their financial performance. Sustainability decisions are made on information available and may be at risk if underlying information is incorrect or withheld. The Fund's performance is compared against the value of the MSCI Emerging Markets Index. The Fund is actively managed meaning that the Fund's manager uses expertise to pick investments rather than tracking a benchmark. A majority of the Fund's assets could be components of the benchmark. Investment of the Fund's assets is not constrained by the benchmark composition and the Fund's manager has discretion within the Fund's investment policy to invest in assets without regard to the benchmark.

The Fund may use derivatives with the aim of risk reduction or efficient management. You can buy and sell shares in the Fund on any dealing day. A dealing day is generally defined as a day on which Irish banks and, if applicable, the relevant stock exchange(s) are open for business. Exceptions are noted on the FSI website. As long as we receive your instruction before 10 am (Irish time) on a dealing day, shares will be bought and sold at that day's price. The Fund will not pay any income out; instead any income will be reflected in the value of your shares.

Intended retail investor: This product is compatible with retail investors who are seeking growth over the long term and who have a basic level of knowledge and/or experience and are able to bear the loss of their investment.

This document describes the Fund, which is a sub-fund of the Company. The Company is an umbrella fund authorised as a UCITS with multiple sub-funds and segregated liability between them under Irish law, which seeks to prevent cross liability between sub-funds. Investors may request but do not have an automatic right to exchange an investment in the Fund for an investment in another class of the Fund or sub-fund of the Company. The depositary of the Company is HSBC Continental Europe Ltd. The prospectus, and annual and semi-annual reports are prepared for the Company as a whole and contain information about all of the sub-funds and share classes of the Company and are available free of charge in English, (the prospectus is also available in German and Swiss German) on firstsentierinvestors.com or by contacting IFS Investor Services Team, 1 Grand Canal Square, Grand Canal Harbour, Dublin 2, Ireland. You can also obtain any of these documents through the relevant facility provided by the Company or the representative in your country as disclosed generally, or in the relevant prospectus country supplement available, at firstsentierinvestors.com. Whilst the Company has exercised its UCITS marketing passport rights in certain countries, please note that not all sub-funds and share classes may be registered for distribution in your jurisdiction. The Fund's share price and other information about the Fund is available at firstsentierinvestors.com.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

The risk indicator assumes you keep the product for 5. The actual risk can vary significantly if you cash in at an early stage and you may get back less. Please note that even investments in the lowest risk class can lose money and that in extremely adverse market conditions investors should be willing to accept severe losses. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

Risk indicator

The summary risk indicator ("SRI") is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as class 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of the fund to pay you. Be aware of currency risk. You may depending on the currency share class you select receive payments in a currency different to your own national currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. Additional risks can be viewed in the Other Relevant Information section of this KID. This product does not include any protection from future market performance so you could lose some or all of your investment. Please refer to the 'Investment Risk' section of the Manufacturer's prospectus for more detail. If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 5 years. Markets could develop very differently in the future.

Recommended holding period: 5 Years 10,000 USD			
Minimum: There is no minimum guaranteed return. You could lose some or all of your investment.		If you exit/cash in after 1 Year	If you exit/cash in after 5 Years (recommended holding period)
Stress scenario	What might you get back after costs	2,880 USD	2,540 USD
	Average return each year	- 71.25%	- 24.00%
Unfavourable scenario	What might you get back after costs	7,090 USD	6,860 USD
	Average return each year	- 29.08%	- 7.25%
Moderate scenario	What might you get back after costs	9,970 USD	11,940 USD
	Average return each year	- 0.31%	3.61%
Favourable scenario	What might you get back after costs	14,030 USD	17,230 USD
	Average return each year	40.33%	11.50%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your adviser or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances. This type of scenario occurred for an investment between 2012 and 2022.

WHAT HAPPENS IF FIRST SENTIER INVESTORS GLOBAL UMBRELLA FUND IS UNABLE TO PAY OUT?

You could lose some or all of your investment due to a default of the Fund or the Company's appointed service providers. The Fund's investments are held by the Depositary or a third party custodian for safekeeping, which means that in case of a default or a loss of financial instrument belonging to the Fund which is not recoverable, you might not be able to get back the current value of your investment. The Company is also an umbrella fund with segregated liability and, under Irish law, there generally will not be the potential for cross liability between the Funds. Notwithstanding the foregoing, there can be no assurance that, should an action be brought against the Company or the Fund in the courts of another jurisdiction, the segregated nature of the Funds would necessarily be upheld. A default by the Fund or the Company's appointed service providers would not be covered by an investor compensation scheme in Ireland.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario. Please be aware that these are only assumptions for the purposes of illustrating the costs.
- USD 10,000 is invested.

Please be aware that these are only assumptions for the purposes of illustrating the costs; if you sell in the first year you may not get back the amount invested, the actual returns will be reduced by the costs and the Fund may not perform in-line with the moderate scenario.

	If you exit/cash in after 1 Year	If you exit/cash in after 5 Years
Total costs	650 USD	1,381 USD
Annual cost impact*	6.5 %	2.3 %

* This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.90% before costs and 3.61% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of Costs

One-Off costs upon entry or exit		If you exit/cash in after 5 Years
Entry costs	5.00% maximum of the amount you pay in when entering this investment. These costs are already included in the price you pay.	500 USD
Exit costs	We do not charge an exit fee for this product.	0 USD
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.94% of the value of your investment per year. This is an estimate based on actual costs over the last year.	127 USD
Transaction costs	0.21% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	22 USD
Incidental costs taken under specific conditions		
Performance Fees	There is no performance fee for this product.	0 USD

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MY MONEY OUT EARLY?

Recommended holding period: 5 Years

You can buy and sell shares in the Fund on any dealing day. A dealing day is generally defined as a day on which Irish banks and, if applicable, the relevant stock exchange(s) are open for business. Exceptions are noted on the FSI website. As long as we receive your instruction before 10 am (Irish time) on a dealing day, shares will be bought and sold at that day's price.

Risks

- **Emerging market risk:** Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.
- **Currency risk:** the Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.

Anti-dilution adjustment

In addition to the costs described above, you may also be charged an anti-dilution adjustment in relation to your subscription, redemption, and/or exchange activities. These generally reflect dealing costs which may be attributable to or incurred by the Fund in buying or selling underlying investments.
