The Central Bank of Ireland is responsible for supervising Aspect Capital Limited (an FCA regulated entity) (the "Investment Manager") in relation to this Key Information Document. This PRIIP is authorised in Ireland. A sub-fund of Aspect UCITS Funds PLC (the "Company"), the Aspect Diversified Trends Fund (the "Fund") is managed by Carne Global Fund Managers (Ireland) Limited (the "Management Company").

Date of Production of KID: 31 May 2024.

You are about to purchase a product that is not simple and may be difficult to understand.

WHAT IS THE PRODUCT?

Type:

Undertakings for Collective Investment in Transferable Securities (UCITS).

Term:

The product is not subject to any fixed term. Where an Initial Charge and/or a dilution levy is imposed, an investor who realises his Shares after a short period may not (even in the absence of a fall in the value of the relevant investments) realise the amount originally invested. The Shares therefore should be viewed as medium to long-term investments.

Objectives:

The aim is to increase the value of your investment while closely controlling risk.

The Fund is actively managed which means that the Investment Manager is actively making investment decisions for the Fund. The Fund is not managed with reference to a benchmark.

To achieve the aim, the Fund provides exposure to the performance of a variant of the Aspect Diversified Programme (the "Programme") through investment in financial derivative instruments and transferable securities which are in the form of structured financial debt instruments, being a type of debt which provides exposure to the return of certain collective investment vehicles (SFIs).

The investment by the Fund in the SFIs shall not exceed 30% of the net asset value of the Fund. Any assets not required to obtain exposure to the Programme, shall be invested in cash and cash equivalents.

The Programme applies a systematic and broadly diversified global investment system, which deploys multiple investment strategies that seek to identify and exploit directional moves in market behaviour of a broad range of asset classes while managing portfolio risk. In particular, it provides exposure to stock indices, currencies, interest rates, commodities, bonds and credit.

Intended Retail Investor:

The sponsor does not market this PRIIP to retail investors, however, the sponsor may market to distributors who in turn market to end retail investors.

Other Information:

The depositary is The Bank of New York Mellon SA/NV.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator

The risk indicator assumes you keep the product for a minimum of 5 years. The redemption price may, depending on the evolution of the net asset value, be higher or lower than the paid issue price. The actual risk can vary significantly if you cash in at an early stage and you may get back less than your initial investment.

The summary risk indicator ("SRI") is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity of the fund to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

For other risks materially relevant to the product which are not taken into account in the summary risk indicator, please read the Fund's Prospectus available at www.aspectcapital.com.

The Fund is subject to normal market fluctuations and the risks associated with investing (which the use of leverage may exacerbate). More risk information may be found under "Risk Factors" in the prospectus.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the fund completed where applicable by that of its reference framework over the last 10 Years.

Recommended minimum holding period: 5 Years Investment: 10 000 EUR			
Scenarios Scenarios Minimum: There is no minimum guaranteed return. You could lose some or all of your investment.		1 Year	5 Years (recommended holding period)
Stress scenario	What you might get back after costs	4,720 EUR	4,210 EUR
	Average return each year	- 52.82 %	- 15.88 %
Unfavourable scenario	What you might get back after costs	6,960 EUR	6,690 EUR
	Average return each year	- 30.39%	- 7.71%
Moderate scenario	What you might get back after costs	10,160 EUR	10,190 EUR
	Average return each year	1.55%	0.38%
Favourable scenario	What you might get back after costs	12,880 EUR	13,250 EUR
	Average return each year	28.82%	5.79%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your adviser or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: This type of scenario occurred for an investment between 12/2015 and 11/2020.

Moderate: This type of scenario occurred for an investment between 04/2017 and 03/2022.

Favourable: This type of scenario occurred for an investment between 04/2019 and 03/2024.

WHAT HAPPENS IF CARNE GLOBAL FUND MANAGERS (IRELAND) LIMITED IS UNABLE TO PAY OUT?

The assets and liabilities of the Sub-fund are segregated from those of the other sub-funds and from those of the manufacturer or the Depository. If the UCITS is not able to pay you out what is due, you may lose your entire investment.

No investor guarantee nor compensation scheme is foreseen in that eventuality.

WHAT ARE THE COSTS?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and should show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed, in the first year you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the fund performs as shown in the moderate scenario.

The amounts shown here are the cumulative costs of the product itself, for two different holding periods. They include potential early exit penalties. The figures assume you invest 10 000 EUR. The figures are estimates and may change in the future.

Investment: 10 000 EUR	If you exit after 1 Year	If you exit after 5 Years (recommended holding period)
Total Costs	228 EUR	1,218 EUR
Annual Cost Impact*	2.28 %	2.29 %

*This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 2.67% before costs and 0.38% after costs.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 Year
