What is this product?

Type: The Fund is domiciled in Ireland and is an open-ended investment company and qualifies as an undertaking for collective investment in transferable securities ("UCITS").

Intended Retail Investor: Investment in the Fund is suitable for those persons and institutions seeking a diversified investment across a number of markets and asset classes; who understand the degree of risk involved (as detailed under the section of the Prospectus and Supplement headed "Risk Factors"), can tolerate a medium level of volatility and believe that the investment is suitable based upon investment objectives and finance needs. Investment in the Fund should be viewed as medium to long-term with an initial subscription of £1,000.

Term: The Fund does not have a fixed term of existence or maturity period but in certain circumstances, as described in the Prospectus, the Fund may be unilaterally terminated following written notice to investors subject to compliance with the Prospectus and applicable regulation. Subject to the liquidation, dissolution and termination rights of the Board of the Company as set forth in the Prospectus, the Fund cannot be automatically terminated.

Objectives:

The Fund aims to increase the value of the amount you invest in it over a period of years. To do this the Fund invests mainly in other Funds ("Underlying Funds") which themselves may invest in equities, Government Bonds, fixed interest securities (which may include sub-investment grade securities), property and other investments.

The Fund is actively managed without reference to any benchmark meaning that the Investment Manager has full discretion over the composition of the Fund's portfolio, subject to the stated investment objective and policies.

The Fund may invest in a range of different asset classes, which may help mitigate the effect of poor performance in any one asset class, however exposure to equities may be up to 100% of the Fund value. Exposure to emerging markets equities will not exceed 20% of the Fund value.

The Depositary of the Fund is Brown Brothers Harriman Trustee Services (Ireland) Limited ("the Depositary")

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less than your original investment. In addition to the market price risk, please refer to the Prospectus for further information.

If the Fund currency differs from your investment currency, you will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level. Poor market conditions could impact your returns.

The value of your investment may fall and you may not get back the amount you invested.

Beside the risks included in the risk indicator, other risks may affect the Fund performance. Please refer to the Company's Prospectus for further details.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The figures shown include all the costs of the product itself, but do not take into account your personal tax situation and may not include all the costs that you pay to your advisor or distributor, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable, moderate, and favourable scenarios shown are illustrations of what you might get back using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Example Investment: GBP 10,000 (Recommended holding period: 5 years)			
Scenarios		If you exit after 1 year	If you exit after 5 years (recommended holding period)
Minimum:	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress Scenario	What you might get back after costs	3,320 GBP	3,850 GBP
	Average return each year	- 66.81 %	- 17.36 %
Unfavourable Scenario	What you might get back after costs	8,810 GBP	9,600 GBP
	Average return each year	- 11.86%	- 0.82%
Moderate Scenario	What you might get back after costs	10,790 GBP	14,150 GBP
	Average return each year	7.87%	7.18%
Favourable Scenario	What you might get back after costs	12,410 GBP	16,190 GBP
	Average return each year	24.1%	10.12%

Unfavourable: This type of scenario occurred for an investment between 01/2022 and 02/2023.

Moderate: This type of scenario occurred for an investment between 03/2014 and 02/2019.

Favourable: This type of scenario occurred for an investment between 07/2013 and 06/2018.

What happens if the Manager is unable to pay out?

The Manager is responsible for administration and management of the Company and does not typically hold assets of the Fund (assets that can be held by depositary are, in line with applicable regulations, held with a depositary in its custody network). The Manager and the Investment Manager have no obligation to pay out since the Fund's design does not contemplate any such payment being made. However, investors may suffer loss if the Company or the depositary is unable to pay out. There is no public or private investor compensation scheme that can compensate for any losses due to the insolvency of the Company, the Manager and the Investment Manager.

What are the costs?

Costs over Time

The person selling you or advising you about the Fund may charge you other costs. If so, this person will provide you with information about these costs and show you the impact that all costs will have on your investment over time.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Fund and how well the Fund performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the Fund performs as shown in the moderate scenario.

- GBP 10,000 is invested.

Example Investment: GBP 10,000		
	If you exit after 1 year	If you exit after 5 years (recommended holding period)
Total costs	226 GBP	1,673 GBP
Annual Cost Impact (*)	2.26 %	2.42 %

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 9.61% before costs and 7.18% after costs.

Composition of Costs

			If you exit after 1 year
One-off costs upon entry or exit	Entry costs	Up to 5.00% is the maximum amount you pay when entering this investment and you could pay less. You can find out the actual charges from your financial advisor, distributor or the third party selling you the product.	0 GBP
	Exit costs	The impact of the costs you pay when exiting your investment. We do not charge an exit fee for this investment, but the person selling you the product may do so.	0 GBP
Ongoing costs	Management fees and other administrative or operating costs	2.18% are incurred each year in managing your investments including those incurred by any underlying investments.	223 GBP
	Transaction costs	0.03% is the impact of the costs incurred when we are buying and selling underlying investments for the product.	3 GBP
Incidental costs taken under specific conditions	Performance fees	There is no performance fee for this product.	N/A

How long should I hold it and can I take my money out early?

The recommended holding period is 5 years for investments made into this Fund. If you sell your shares before the end of the recommended holding period you may increase the risk of receiving back less than you invested.

Recommended holding period: 5 years
