

## Sustainability-related disclosures for abrdn SICAV I - Asian SDG Equity Fund

This document provides you with a summary of sustainability-related information available on our website about this financial product. It is prepared in relation to Article 10 of the Sustainable Finance Disclosure Regulation (EU) 2019/2088. The information disclosed is required by law to help you understand the sustainability characteristics and/or objectives and risks of this financial product.

**Date of Publication:** 2024-09-30

**Legal entity identifier** 2138001SZMMAO7HILY92

Summary	
	<p>The Fund is subject to article 9 of the European Union's (EU) 2019/2088 Sustainable Finance Disclosure Regulation ("SFDR") and has a sustainable investment objective. In line with the SFDR criteria for sustainable investments (positive contribution of the economic activity, no significant harm of the investment and good governance by the investee company) abrdn have developed an approach to identifying sustainable investments, the methodology of which is detailed in the Q&amp;A below. The Fund has an expected minimum of 75% in Sustainable Investments. The Fund has not set a minimum proportion of investment in Taxonomy aligned economic activities, including Taxonomy-aligned fossil gas or nuclear energy related activities.</p> <p>The Fund aims to achieve long term growth by investing in companies in Asia Pacific (excluding Japan) countries which in our view will make a positive contribution to society through their alignment achieving the United Nation's Sustainable Development Goals ('SDGs'). The Fund aims to outperform the MSCI AC Asia Pacific ex Japan Index (USD) benchmark before charges. Fund invests at least 90% of the Fund's assets in its investment universe. This is defined as equities and equity-related securities of companies that are under active research coverage by the investment team and are listed, incorporated or domiciled in Asia Pacific countries (excluding Japan), or companies that derive a significant proportion of their revenues or profits from Asia Pacific (excluding Japan) operations or have a significant proportion of their assets in those countries. The Fund may also invest in equities and equity-related securities of companies that have a connection with a Frontier Market. The Fund may invest up to 30% of its net assets in Mainland China equities and equity-related securities, although only up to 20% of its net assets may be invested directly through QFI regime, the Shanghai-Hong Kong and Shenzhen-Hong Kong Stock Connect programme or by any other available means. Investment in all equity and equity related securities will follow the abrdn Asian SDG Equity Investment Approach, which is published at <a href="http://www.abrdn.com">www.abrdn.com</a>, under <b>Fund Centre</b>.</p> <p>This Fund has a financial benchmark that is used for portfolio construction but does not incorporate any sustainable criteria and is not selected for the purpose of attaining these characteristics. This financial benchmark is used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.</p> <p>The Fund seeks to generate strong long-term performance by allocating capital to companies that may deliver a strong financial return and demonstrate – via their products, services, and actions – a clear and material alignment to one or more of the UN SDGs.</p> <p>There are three core principles which underpin our "Asian SDG Equity Investment Approach" and the time we dedicate to ESG analysis as part of our overall equity research process:</p> <ul style="list-style-type: none"><li>• ESG factors are financially material and impact corporate performance</li><li>• Understanding ESG risks and opportunities alongside other financial metrics allows us to make better investment decisions.</li><li>• Informed and constructive engagement helps foster better companies, enhancing the value of our clients' investments.</li></ul> <p><i>The Asian SDG Equity Fund follows our "Asian SDG Equity Investment Approach." This approach identifies companies which are aligned to the Sustainable Development Goals. These goals are designed to address the world's major long-term challenges. These include climate change, growing social inequality, and unsustainable production and consumption. The Fund will invest in companies with minimum of 20% of their revenue, profit, capital or operating expenditure or research and development linked to the UN's SDGs. Within our equity investment process, we consider the quality of the businesses management team and analyse the environmental, social and governance (ESG) opportunities and risks impacting the business and appraise how well these are managed. We assign a proprietary score (ranked 1 – 5) to articulate the quality attributes of each company, one of which is the ESG Quality rating. This enables the portfolio managers to exclude companies with material ESG risks and positively skew the portfolio towards ESG opportunities and to build well-diversified, risk-adjusted portfolios. Using the ESG Quality rating, the fund will exclude any companies with the lowest ratings of 4 or 5. Distinct company research notes for each stock in the SDG funds capture and formally document the SDG impact made by each company and the needs they meet across the SDG pillars.</i></p> <p><i>Additionally, we satisfy the three binding criteria for Sustainable Investment:</i></p> <ul style="list-style-type: none"><li>• Economic contribution</li><li>• Do not significant harm</li><li>• Good Governance</li></ul>

	<p><i>abrdn also apply a set of company exclusion which are related to normative screening (UN Global Compact, ILO and OECD), Norges Bank Investment Management (NBIM), State Owned Enterprises (SOE), Weapons, Tobacco, Gambling, Alcohol, Thermal Coal, Oil &amp; Gas and Electricity Generation. These criteria are applied in a binding manner and on an ongoing basis.</i></p> <p>Due diligence for each asset held is detailed in the Fund's Investment Approach document, published at <a href="http://www.abrdn.com">www.abrdn.com</a>, under <b>Fund Centre</b>.</p> <p>The Fund's ESG screening and binding commitments determine that sustainable objectives of holdings are met and are part of the overall portfolio construction. In addition, abrdn consider Principal Adverse Impact Indicators (PAIs) within our investment process for the Fund, which is detailed in the Q&amp;A below.</p> <p>Monitoring of the Fund's sustainable objectives are carried out on desk by the fund managers, through systematic oversight and independently through abrdn's ESG Governance teams.</p> <p>abrdn have selected and monitor several internal and external data sources to attain sustainable objectives. As part of the onboarding and review processes, we have several controls in place to test quality, which include but are not limited to, coverage, validity checks and consistency.</p> <p>For details on the Stewardship and Engagement policies, please see abrdn's Stewardship Report published on <a href="http://www.abrdn.com">www.abrdn.com</a> under <b>Sustainable Investing</b>, within the <b>Governance and Active Ownership</b> section.</p>
<p><b>No significant harm to the sustainable investment objective</b></p>	<p>The Fund's uses the UN's underlying SDG targets and indicators in assessing alignment and materiality. abrdn has mapped the SDGs to eight pillars:</p> <ul style="list-style-type: none"> <li>• Circular Economy</li> <li>• Sustainable Energy</li> <li>• Food &amp; Agriculture</li> <li>• Water &amp; sanitation</li> <li>• Health &amp; Social Care</li> <li>• Financial inclusion</li> <li>• Sustainable Real Estate &amp; Infrastructure</li> <li>• Education &amp; Employment</li> </ul> <p>The Fund assesses a company's alignment with the SDGs through the eight-pillar framework. The Fund will invest in companies with minimum of 20% of their revenue, profit, capital or operating expenditure or research and development linked to the SDGs. For companies classified in the benchmark as "Financials", alternative measures of materiality are used based on loans and customer base.</p> <p>The Fund will also invest up to 20% in SDG enablers. These are companies that are considered integral to the supply chains that enable progress towards the UN's SDGs and meet the 20% materiality requirement, but their impact is not currently reliably measurable via their final product or service.</p> <p>Distinct company research notes for each stock in the Fund capture and formally document the SDG alignment. Case studies and further analysis are reported annually in the Fund's SDG Report made available to investors online. At Fund-level, attainment of the sustainable investment objective is measured by the Fund's exposure to the eight pillars and SDG enablers.</p> <p>The Fund targets a lower carbon intensity, and greater board diversity, than the benchmark.</p> <p>Within our equity investment process, we consider the quality of the businesses management team and analyse the environmental, social and governance (ESG) opportunities and risks impacting the business and appraise how well these are managed. We assign a proprietary score (ranked 1 – 5) to articulate the quality attributes of each company, one of which is the ESG Quality rating. This enables the portfolio managers to exclude companies with material ESG risks and positively skew the portfolio towards ESG opportunities and to build well-diversified, risk-adjusted portfolios. Using the ESG Quality rating, the fund will exclude any companies with the lowest ratings of 4 or 5.</p> <p>The Fund also applies a set of company exclusion which are related to normative screening (UN Global Compact, ILO and OECD), Norges Bank Investment Management (NBIM), State Owned Enterprises (SOE), Weapons, Tobacco, Gambling, Alcohol, Thermal Coal, Oil &amp; Gas, and Electricity Generation.</p> <p>As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives.</p> <p>abrdn have created a 3-step process to ensure consideration of DNSH:</p> <ol style="list-style-type: none"> <li>i. <b>Sector Exclusions</b> abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil &amp; Gas Exploration, Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.</li> <li>ii. <b>DNSH Binary Test</b></li> </ol>

	<p>The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) “do no significant harm”.</p> <p>Pass indicates under abrdn’s methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn’s approach is aligned with the SFDR PAIs included within tables 1, 2 &amp; 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.</p> <p>iii. DNSH Materiality Flag</p> <p>Using a number of additional screens and flags, abrdn consider the additional SFDR PAI’s indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue.</p> <p>The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.</p>
<p><b>Sustainable investment objective of the financial product</b></p>	<p>The Fund aims to achieve long term growth by investing in companies in Asia Pacific countries (excluding Japan), which in abrdn’s view will make a positive contribution to society through their alignment achieving the United Nation’s Sustainable Development Goals (‘SDGs’).</p> <p>Our SDG Equity strategies follow a fundamental, bottom-up investment research process in which ESG analysis and company engagement are integral parts of our assessment of the investment potential of all companies.</p> <p>The Fund follows the abrdn “Asian SDG Equity Investment Approach.” This approach identifies companies which are aligned to the SDGs. These goals are designed to address the world’s major long-term challenges. These include climate change, growing social inequality, and unsustainable production and consumption.</p> <p>This Fund has a financial benchmark that is used for portfolio construction but does not incorporate any sustainable criteria and is not selected for the purpose of attaining these characteristics. This financial benchmark is used as a comparator for Fund performance and as a comparison for the Fund’s binding commitments.</p>
<p><b>Investment strategy</b></p>	<p>The Fund seeks to generate strong long-term performance by allocating capital to companies that may deliver a strong financial return and demonstrate – via their products, services, and actions – a clear and material alignment to one or more of the SDGs.</p> <p>There are three core principles which underpin the abrdn Asian SDG investment approach and the time we dedicate to ESG analysis as part of our overall equity research process:</p> <ul style="list-style-type: none"> <li>• ESG factors are financially material and impact corporate performance.</li> <li>• Understanding ESG risks and opportunities alongside other financial metrics allows us to make better investment decisions.</li> <li>• Informed and constructive engagement helps foster better companies, enhancing the value of our clients’ investments.</li> </ul> <p>The Fund follows the abrdn “Asian SDG Equity Investment Approach.” This approach identifies companies which are aligned to the Sustainable Development Goals. These goals are designed to address the world’s major long-term challenges. These include climate change, growing social inequality, and unsustainable production and consumption.</p> <p>The Fund assesses a company’s alignment with the SDGs through the eight-pillar framework: sustainable energy, circular economy, health &amp; social care, water &amp; sanitation, education &amp; employment, food &amp; agriculture, sustainable real estate &amp; infrastructure and financial inclusion. The Fund will invest in companies with minimum of 20% of their revenue, profit, capital or operating expenditure or research and development linked to the UN’s SDGs.</p> <p>For companies classified in the benchmark as “Financials”, alternative measures of materiality may be used. We require 20% materiality as measured by (i) new or existing loans to underserved clients if those target loans are growing on an annualised basis over three years; or (ii) new or existing underserved customers if those target customer numbers are growing on an annualised basis over three years; or (iii) pre-provision operating profits generated by underserved clients.</p> <p>The Fund will also invest up to 20% in SDG enablers.</p> <p>Distinct company research notes for each stock in the Sustainable Development funds capture and formally document the SDG alignment of each company and the needs they meet.</p> <p>Within our equity investment process, we consider the quality of the businesses management team and analyse the environmental, social and governance (ESG) opportunities and risks impacting the business and appraise how well these are managed. We assign a proprietary score (ranked 1 – 5) to articulate the quality attributes of each company, one of which is the ESG Quality rating. This enables the portfolio</p>

	<p>managers to exclude companies with material ESG risks and positively skew the portfolio towards ESG opportunities and to build well-diversified, risk-adjusted portfolios. Using the ESG Quality rating, the fund will exclude any companies with the lowest ratings of 4 or 5.</p> <p>The Fund also targets a lower carbon intensity target lower than, and greater board diversity, than the benchmark.</p> <p>In addition, abrdn apply a set of company exclusion which are related to normative screening (UN Global Compact, ILO and OECD), Norges Bank Investment Management (NBIM), State Owned Enterprises (SOE), Weapons, Tobacco, Gambling, Alcohol, Thermal Coal, Oil &amp; Gas, and Electricity Generation.</p> <p>For this Fund, the investee company needs to follow good governance practices in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance. This can be demonstrated by the monitoring of certain PAI indicators, for example corruption, tax compliance and diversity. In addition, by using abrdn’s proprietary ESG scores within the investment process abrdn screen out any investments with low governance scores. Our governance scores assess a company’s corporate governance and management structure (including remuneration of staff policies) and the quality and behaviour of its leadership and management. A low score will typically be given where there are concerns in relation to financially materially controversies, poor tax compliance or governance concerns, or poor treatment of employees or minority shareholders.</p> <p>The investment must further be aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process.</p>
<p><b>Proportion of investments</b></p>	<p>The Fund commits to a minimum of 75% in Sustainable Investments, including a minimum commitment of 15% to assets with an environmental objective and 15% to social objectives.</p> <p>The Fund invests a maximum of 25% of assets in the “Non Sustainable” category, which is mainly made up of cash, money market instruments and derivatives.</p>

<p><b>Monitoring of sustainable investment objective</b></p>	<p><b>First line</b>          Our investment teams have the primary responsibility for implementing the investment strategy.</p> <p>Our sustainable investing governance committees support investment desks with regards to the implementation of the framework as well as understanding the regulatory environment.</p> <p><b>Second line</b>  <b>Investment Risk</b>          abrdn’s Investment Risk Department carries out the analysis of risks and their overall contribution to the Fund’s risk profile. The RAG status of funds as well as action taken to address moderate/high risks are reported to boards, and relevant committees as required, on a regular basis. The Investment Risk Department also undertakes an annual review of the fund risk profiles to determine the efficacy of the current limits and any potential forward looking trends.</p> <p><b>Compliance</b>          abrdn’s Compliance function reviews a range of funds’ legal and regulatory documents to ensure they comply with regulations. Compliance also reviews marketing communications, including fund and non-fund specific material, to ensure marketing material and ESG related statements are clear, fair and non-misleading.</p> <p>abrdn’s EMEA Compliance function plays a key role in monitoring ESG related investment limits and adherence to the binding commitments of funds that have environmental or social characteristics (in line</p>
--	--

	<p>with SFDR Article 8) and funds that have sustainable investment objectives (in line with SFDR Article 9). Through the ESG Regulatory &amp; Standards Taskforce, Compliance feeds all sustainability-related regulatory developments and new requirements to relevant first line stakeholders to ensure these are duly considered and integrated into abrdn's investment approach and adequately reflected in our disclosures. In this taskforce, Compliance teams from all jurisdictions in which abrdn operates are represented.</p> <p>Finally, a dedicated Monitoring &amp; Oversight team operates a risk-based programme to provide assurance to senior management over the effectiveness of controls to ensure regulatory compliance. The outcome of the reviews is reported to the relevant entity boards and other governance forums, including the Risk and Capital Committee, Group Audit Committee and Executive Leadership Team Controls meeting. Assurance activities include both thematic reviews of risk or regulatory topics and focused reviews on specific regulatory or customer outcomes.</p> <p><b>Third line</b> abrdn's Internal Audit function conducts internal audits including of sustainability rule implementation as part of its internal audit agenda.</p>
<p><b>Methodologies</b></p>	<p>The Fund aims to achieve long term growth by investing in companies in Asia Pacific countries (excluding Japan), which in abrdn's view will make a positive contribution to society through their alignment achieving the United Nation's Sustainable Development Goals ('SDGs').</p> <p>Our SDG Equity strategies follow a fundamental, bottom-up investment research process in which ESG analysis and company engagement are integral parts of our assessment of the investment potential of all companies.</p> <p>The Fund follows the abrdn "Asian SDG Equity Investment Approach." This approach identifies companies which are aligned to the SDGs. These goals are designed to address the world's major long-term challenges. These include climate change, growing social inequality, and unsustainable production and consumption.</p> <p>This Fund has a financial benchmark that is used for portfolio construction but does not incorporate any sustainable criteria and is not selected for the purpose of attaining these characteristics. This financial benchmark is used as a comparator for Fund performance and as a comparison for the Fund's binding commitments. this Fund considers Principal Adverse Impacts (PAI) on sustainability factors.</p> <p><b>Principal adverse impacts consideration</b> Yes, the Fund commits to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring is in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.</p> <ul style="list-style-type: none"> <li>• PAI 1: GHG emissions (scope 1 and 2)</li> <li>• PAI 2: Carbon footprint (scope 1 and 2)</li> <li>• PAI 3: GHG intensity of investee companies (scope 1 and 2)</li> <li>• PAI 10: Violations of the UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises</li> <li>• PAI 13: Board gender diversity</li> <li>• PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)</li> </ul> <p><b>Adverse impacts monitoring</b> Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:</p> <ul style="list-style-type: none"> <li>• UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.</li> <li>• Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).</li> <li>• Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.</li> </ul> <p>abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at <a href="http://www.abrdn.com">www.abrdn.com</a> under "<b>Fund Centre</b>".</p> <p><b>Post-investment the above PAI indicators are monitored in the following way:</b></p> <ul style="list-style-type: none"> <li>• company carbon intensity and GHG emissions is considered via our ESG integration risk analysis.</li> </ul>

	<ul style="list-style-type: none"> <li>On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.</li> </ul> <p><b>Post-investment we also undertake the following activities in relation to additional PAI's:</b></p> <ul style="list-style-type: none"> <li>Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.</li> <li>abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.</li> <li>Governance indicators are monitored via our proprietary governance scores and risk frameworks, including consideration of sound management structures, and remuneration.</li> </ul> <p><b>Adverse impact mitigation</b></p> <ul style="list-style-type: none"> <li>PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund.</li> <li>PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for engagement. These PAI indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.</li> </ul>
<p><b>Data sources and processing</b></p>	<p><b>Data Sources</b></p> <p>We have selected several data sources to support our sustainability indicators, Sustainable Investment calculations and PAI commitments. We use a combination of publicly available information, third-party data and ratings providers, proprietary ESG scoring, primary research and directly obtained information through engagement with companies.</p> <p>The Regulatory Technical Standards (RTS) under the EU Sustainable Finance Disclosure Regulation call on financial market participants to source sustainability data in various ways, including research providers, internal analysis, commissioned studies, publicly available information, and direct engagement with companies.</p> <p>The following sources are used by abrdn and our third-party data providers to collect company data and form a view on sustainability products and practices:</p> <ul style="list-style-type: none"> <li>Company direct disclosure, including but not limited to: sustainability reports, annual reports, regulatory filings, investor updates, company websites and direct engagement with company representatives.</li> <li>Indirect information sources, including but not limited to: government agency published data, industry and trade associations, non-governmental organization (NGO) reports and websites, trade union reports, media and periodicals, and financial data providers.</li> </ul> <p>Where company disclosure is unavailable, we may also choose to leverage estimated metrics based on sector averages or provided by credible third parties. These datasets are built based on proprietary methodologies using the data sources mentioned above.</p> <p><b>Data Quality assurance process</b></p> <p><i>Third Party Data Sources</i></p> <p>We work with several third-party ESG data providers and use their data points both as inputs into derived analytics, such as internal ESG house scores, as well as in raw format, for example in screening. As part of our onboarding process, we ensure that these providers have appropriate quality assurance in place. On an ongoing basis we have both qualitative governance and challenge processes as well as quantitative checks to understand quality of data, data inputs and gaps where appropriate.</p> <p>Our third-party providers regularly review their data collection and assessment methodologies. They also have an internal escalation process to allow for cases that require further interpretation or an update to the relevant methodology. At abrdn, we expect our third-party data providers to engage with us as appropriate, providing a timely response to queries and any concerns raised about the day-to-day use of their data and assessments within our investment processes.</p> <p><i>Qualitative Assessment Process</i></p> <p>In all cases where we apply our own insights or judgment, this follows a rigorous quality assurance and oversight process.</p>
<p><b>Limitations to methodologies and data</b></p>	<p>For all data sources, the availability and quality of company disclosed data varies, typically in line with company size and the regional domicile. Smaller companies and emerging market regions are typically more challenging areas, though this has been improving over time. In some regions, corporate sustainability disclosure regulations are coming into force, which improves the information available to us, though this may not cover the full range of ESG issues and data required to form a complete view of a company's sustainability products and practices. For many companies, a blend of direct and indirect sources, estimated data, and internal insights from our research and engagement are used to form a</p>

	<p>view. Across our third-party data providers, estimated data is around 20-40%, depending on the particular data point.</p> <p>In cases where judgement is required, for example within third-party or proprietary ESG scoring, there may be instances where we reach an incorrect conclusion. For example, a media allegation or controversy may arise, highlighting that a company's remedial action on an identified ESG challenge is not as advanced as we expected. In such instances, we will investigate the issue and take appropriate action within our funds as soon as possible. Once the immediate issue is addressed, we will consider how we can improve our approach or methodologies to avoid similar issues in the future.</p> <p>Economic contributions to environmental and social objectives, which form a key component of the SFDR definition of Sustainable Investments, are not defined within the SFDR. As a result, there are varying interpretations and methodologies in use across the investment industry. The percentage of Sustainable Investments reported in funds cannot be meaningfully compared across financial market participants.</p> <p>Within our Sustainable Investment calculations, abrdn uses the six environmental objectives of the EU Taxonomy to inform contributions to environmental objectives and the 17 Sustainable Development Goals to inform contributions social objectives. We use both quantitative and qualitative information to arrive at these figures, both of which require a degree of interpretation or judgement on whether the economic contribution should be considered 'Sustainable' under the SFDR definition. We rely on third-party data providers to form an initial view, and any internal insights we apply follow a robust, independent oversight process, with the rationale for our conclusions clearly documented.</p> <p>Within our screening processes, we rely on third-party data providers to identify companies that do not meet our criteria, based on the parameters and scope of the exclusions that we define for our funds. If we receive information from other sources (e.g., NGO or media reports) that is inconsistent with these screening results, we will investigate this to confirm whether a company is appropriate for the fund as soon as possible. Our portfolio managers also sense check the results of the screening for their funds and highlight any inconsistencies or unexpected results that we may wish to query with our provider.</p>
<p><b>Due diligence</b></p>	<p>Due diligence for each asset held is detailed in the Fund's Investment Approach document, published at <a href="http://www.abrdn.com">www.abrdn.com</a>, under <b>Fund Centre</b>.</p>
<p><b>Engagement policies</b></p>	<p>We believe it's our duty to be active and engaged owners of the assets in which we invest. Our aim is to both enhance and preserve the value of our clients' investments by considering a broad range of factors that impact on the long-term success of the company. Through our engagement we seek to improve the financial resilience and performance of investments, sharing insights from our ownership experiences across geographies and asset classes. Where we believe we need to catalyse change, we will endeavour to do so through our strong stewardship capabilities.</p> <p>As a global investor, with a focus on sustainability, we leverage our scale and market position to raise standards in both the companies and industries in which we invest and help drive best practice across the asset management industry. To meet the needs of our clients and key stakeholders, we focus on these core areas:</p> <ol style="list-style-type: none"> <li>1. Our investment process: We integrate and appraise ESG factors in our investment process and seek to generate the best long-term outcomes for our clients, consistent with their risk and asset allocation preferences.</li> <li>2. Our investment activity: We actively take steps as stewards and seek to deliver longterm, sustainable value consistent with our clients' objectives and risk tolerance.</li> <li>3. Our client journey: We clearly define how we act in our clients' interests in delivering stewardship and ESG principles and transparently report on our actions to meet those interests.</li> <li>4. Our corporate influence: We actively support enhancements to policy, regulatory and industry standards to deliver a better future for our clients, the environment and society.</li> <li>5. Our corporate activity: We gather data to understand and manage the material ESG factors in our own operations to ensure our own impact contributes to positive outcomes for stakeholders.</li> </ol> <p>Our engagement process consists of four components:</p> <ul style="list-style-type: none"> <li>• Review: Part of our ongoing due diligence and frequent interactions led by the analyst responsible for oversight of the investment.</li> <li>• Respond: Reacting to an event that may impact a single investment or a selection of similar investments. This may include but is not limited to media-related controversies.</li> <li>• Enhance: Designed to seek change that, in our view, would enhance the value of our investment.</li> <li>• Thematic: Resulting from our focus on a particular ESG theme, such as climate change, diversity and inclusion or modern slavery.</li> </ul> <p>Our regular 'review' meetings are normally held with the investee company's executive management, but we will also engage with board members – generally the chair or other non-executive directors. Such meetings further develop our understanding of how the board is fulfilling its responsibilities and give us the opportunity to communicate views constructively, as and when appropriate.</p> <p>Our 'respond' and 'enhance' engagements are bespoke interactions with specific outcome intentions and are defined as priority engagements. These also focus on the delivery of long-term value from the investments we make on behalf of clients. The nature of ESG risks is such that they are ever-present but</p>

	<p>often require a long-term outlook to fully assess them. Our engagements will often be with board members, both executive and non-executive, but will also include detailed assessment of specific risk mitigation through engagement with relevant experts within a company, including those relating to sustainability.</p> <p>For our 'thematic' engagements, we select investments which are felt to be materially impacted by sustainability themes identified by our research. These themes may arise in the short term due to particular events or may be long running in nature and impacting many sectors and investments. Engagements relating to a specific theme are likely to occur over multiple planning periods and are often led by our Investments Sustainability Group (ISG) experts.</p> <p><i>Escalation approach</i> We consider escalation on a case-by-case approach and aim to identify risks early and set measurable milestones with investee companies. We may choose to refer to escalation in certain instances where a company is unresponsive, or in our view, the company is insufficiently responding to a material issue.</p> <p>We have a decision tree that provides potential tools of escalation in the instance when an investee company in our view, has inadequately responded to a material risk. At abrdn, we engage with investments through escalation actions to drive change and achieve outcomes toward objectives. A flexible escalation approach is essential, given certain escalation actions may occur simultaneously or as part of regular due diligence with investments.</p> <p>Please also see our Engagement Policy published on <a href="http://www.abrdn.com">www.abrdn.com</a> under Sustainable Investing.</p>
<p><b>Attainment of the sustainable investment objective</b></p>	<p>The sections above details how the Fund attains its sustainable investment. This Fund has a financial benchmark that is used for portfolio construction but does not incorporate any sustainable criteria and is not selected for the purpose of attaining the sustainable objectives</p>
